

RECOMMENDED PLACEMENT

The Honey Hole Nursery is best utilized in 2-3' of water. We suggest you place these structures away from regular fishing areas and use the marker float and rope that are included to mark these structures so you don't snag your lures!

1 Pack Assembly

If you've purchased a single Honey Hole Nursery, we have already assembled it for you. All you have to do is attach the marker float to the top of it using the included rope, and place it in the water!

2 Pack Assembly

We do our best to cut the mesh as close as possible to the ends, but there are still some slightly sharp edges that could cause scratching to the hands. Gloves are recommended while assembling the Honey Hole Nurseries.

1. First, pull the bodies apart. The Grass limbs are already attached to each of the bodies.
2. Second, there are two tops included. Since the units are nested, one is slightly smaller than the other, so each top has a designated body. The tops and bodies are marked with colored stickers. Match up the colors and set the correct top on the correct body, aligning the sticker on the body with the sticker on the top.
3. Holding the top a couple of inches above the body of one of the Nurseries, reach in and "fluff" the limbs/leaves of the Grass stems to your liking, pulling the leaves through the holes in the top.
4. When you have the leaves where you want them, place the top on the body. Secure the top to the sides by positioning the zip ties in line with the hog rings at the bottom.
5. Continue attaching the rest of the top by attaching 1 zip tie in line with each hog ring at the bottom. You'll use 20 zip ties per Nursery. If you wish, clip to remove the long ends of the zip ties and discard.
6. Finish by attaching the marker float to the center of the top using rope - cut to the desired length for the water depth.
7. Repeat steps 3 through 7 for the second Nursery.

Each unit consists of:
(1) Mesh Body
(4) 24 in. Honey Hole Grass Limbs
(1) Marker Float & Rope

If a 2-pack is purchased, the units will be nested in the box and (40) zip ties will be included for attaching the tops to each unit.

3 Pack Assembly

We do our best to cut the mesh as close as possible to the ends, but there are still some slightly sharp edges that could cause scratching to the hands. Gloves are recommended while assembling the Honey Hole Nurseries.

1. First, pull the bodies apart and lay the pieces out.
2. Assemble the 2 partially completed Nurseries first, following the 2 pack instructions on the front of this sheet. Use them for reference to complete the final one, if necessary.
3. To build the final Nursery, first take the longer piece of mesh that is the Nursery body. Square up and connect it together at the seam, using 5 zip ties spaced apart ensuring seam stability.
4. Next, you'll attach the bottom. It's the 1" mesh piece. Align the sticker on the body with the sticker on the bottom.
5. You'll attach the two pieces together with 2 zip ties in each corner. Starting on the seam side, attach the bottom to the body using 1 zip tie in the first square. Do the same on the other side of the seam. Repeat with the remaining 3 corners.
6. Continue attaching the rest of the bottom by attaching 3 zip ties in between each of the straight edges. You'll use 20 zip ties on the bottom. If you wish, clip to remove the long ends of the zip ties and discard.
7. Flip the Nursery over and attach the Limbs to the bottom mesh, inside the enclosure, using 1 zip tie per limb.
8. Next, take the top of the Nursery and position it so you align the sticker on the body with the sticker on the top. Holding it a couple of inches above the body, reach in and "fluff" the limbs/leaves of the Grass stems to your liking, pulling the leaves through the holes in the top.
9. When you have the leaves where you want them, lay the top on the body and attach starting with the seam side. On each corner, count over 2 squares from the seam and attach the top to the body using one zip tie. Do the same on the other side of the seam. Repeat with the 2nd, 3rd and 4th sides.
10. Continue attaching the rest of the top by attaching 3 zip ties, equally spaced, on each of the sides. You'll use 20 zip ties in total on the top. If you wish, clip to remove the long ends of the zip ties and discard.
11. Finish by attaching the marker float to the center of the top using rope - cut to the desired length for the water depth.
12. To install, hold them upright (with the bottom - larger mesh - down) and simply toss them in 2-3' of water.

WHAT'S INCLUDED IN 3 PACK:

(2) Partially Completed Nurseries
w/ Bottoms, 4 Limbs, & Body
Connected
(3) Tops (1" square mesh)
(1) Bottom (1" square mesh)
(1) Nursery Body
(4) Grass Limbs
(3) Floats w/ String
(89) Zip Ties (20 ea. for 2 partially
completed Nurseries & 49 for 1
needing full assembly)
